

T550B TURBINE KIT for RB26DETT

Drop in ball bearing turbo kit for RB26DETT!

Ball bearing turbo is where Tomei started its history of turbo products, and the legendary ball bearing is now back as T550B Turbo with much improved design.

Trusted and proven IHI ball bearing center unit with all new compressor / turbine wheel blades and housing that have been redesigned from scratch to surpass the old journal bearing design at all stage.

Smooth spool from the low range straight up to the high RPM that makes the most of the legendary RB26DETT motor.

FEATURES

Great low-mid characteristic

Improved low-mid RPM range for a much better driving experience on the street. Designed to reduce surging and make the power curve as linear with engine RPM as possible for a easy, smooth and stress-free driving.

Total set up to enjoy the true performance of RB26
Application specific drop-in design that is perfect choice to step-up from the stock turbo. T550B is never a huge, peaky competition-only turbo, its design concept is to "enjoy" the RB26 motor. Total set up such as exhaust system makes the combination of the RB26 and T550B turbo even more enjoyable.

1 YEAR WARRANTY

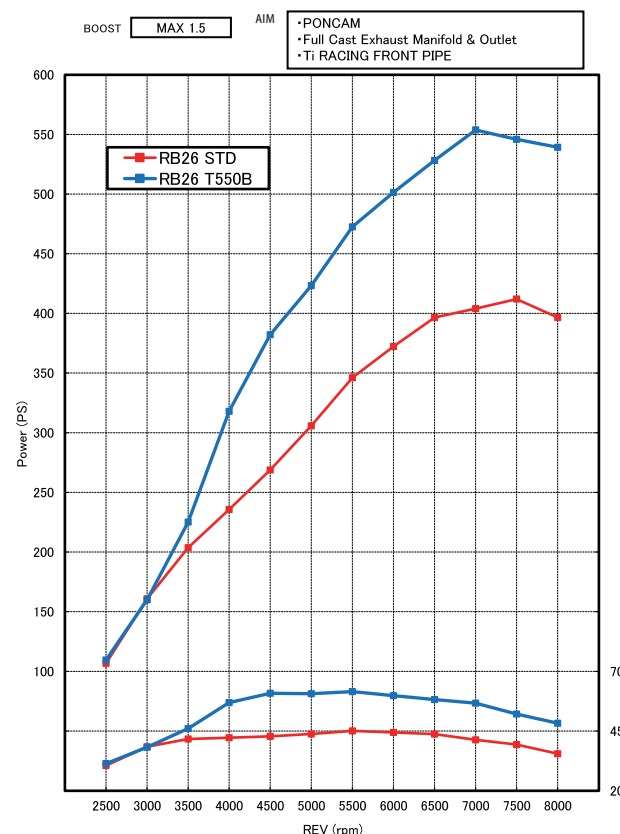

The T550B Turbo Kit comes with a 1 year limited warranty after purchase.

APPLICATION **BNR32/BCNR33/BNR34/WGNC34(260RS only)**

FEATURE&SPEC

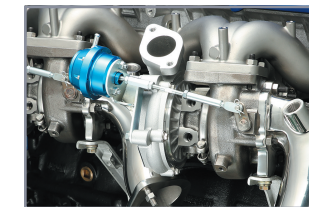

IHI BALL-BEARING CHRA

The high precision ball bearing center housing rotating assembly made by IHI lowers the friction at pre-spool and dramatically improves the response. This also contributes for its superior durability.

BOLT-ON APPLICATION

Easy bolt-on installation, no modifications required.

REINFORCED ACTUATOR

Remarkable stability under high boost.
