ORIGINAL TITANIUM MATERIAL

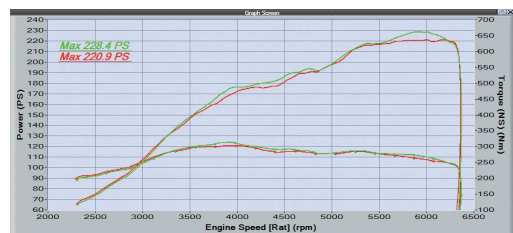

- STRONG** The strong elastic properties of Titanium has allowed us to make the piping as thin as possible, without comprising strength for ultra light weight.
- DURABLE** The high heat and corrosion resistance properties that this muffler is made for gives maximum longevity, even with extreme harsh driving conditions.

HIGH SOUND QUALITY

Only the racing layout muffler design in full Titanium can produce the exhilarating race sound that is second to none.

COMPARISON TO STOCK

80mm main pipe, racing straight layout and lightweight single tail design provides another level of performance and weight reduction.
