TURBO SUCTION HOSE for EJ

**Now available for
GR#,GV#,VAB!**

**All new adapter elbow pipe
for clean and stress-free installation!**

This new EJ Suction Hose Kit contains an elbow adapter pipe to beautifully and perfectly fit GR#, GV# and VAB, models with Drive By Wire throttle body which is larger than the cable throttle body of older models.

The elbow adapter optimizes the hose position and prevent to strain on the blow off return hose against the DBW throttle body.

[Existing GD# hose (w/o the elbow pipe) on a DBW model]

Efficiency & Durability

With a larger flow capacity and reduced resistance. The pipe was designed to be as straight as possibly allowed. The reinforced hose design allows the hose to maintain its structure during high boost conditions. This then assists the turbo obtain a stable consistent flow of air.

Compatibility Range

An adapter is also supplied with it to allow compatibility with up to 3 different popular turbo types.

[With the elbow pipe on a DBW model]

Direct Bolt-On

The product was designed to allow ease of installation and removal. The 2 nipple locations on the pipe are removable. This allows the product to be broken down with ease to minimize labor time.

APPLICATION : GR# / GV# /VAB

JPY ¥35,500
