OIL PAN BAFFLE PLATE for 2JZ-GTE

Protects the engine under the strong G-force on track!

During hard acceleration, deceleration and cornering, the sudden change in inertial forces will cause the oil to jump and move around too much. When this happens, the oil can move away from the oil pickup, which then in turn cuts oil supply to the engine. The TOMEI baffle plate is designed to prevent this problem from happening especially when the car is used for competition use.

■ Keeps the oil from sloshing away from the oil pickup during hard cornering.

It allows the one way movement of oil and can keep it where the oil pickup is at all times by preventing oil deviation with the use of swing plates on hinges.

■ Competition proven, true performance

Designed based on the knowledge and experience we acquired in Formula Drift series.

It's well proven in the real competition to increase reliability of the whole engine by helping to properly lubricate the engine at all times.

SPEC

MATERIAL	SUS304
UPPER BAFFLE THICKNESS	1mm
LOWER BAFFLE THICKNESS	1mm
WEIGHT	UPPER : 475g LOWER : 635g (Including rubber valve)

JPY ¥21,000

P/N: 194005

This product has been designed to fit Toyota P/N:12102-46040 (OIL PAN NO.2) and P/N: 15104-46070 (STRAINER ASSY) only.
