# FORGED PISTON for RB26DETT

**2 more size options are now available!**

A wider range of piston bore sizes is now available.

The 86.2mm bore size has been introduced as a first step before boring further to 86.5mm on the RB26 block, which is becoming increasingly difficult to find brand new these days. Additionally, an 87.5mm bore size has been added also to accommodate RB26 blocks that have already been bored to 87.0mm. Ellipse and barrel-shaped design basing on precise analysis to achieve the best piston profile at metal-expanded condition under operating temperature range.

This design of TOMEI original helps to keep the best alignment against the piston cylinders that reduces friction loss, blow-by gas, as well as unwanted mechanical noise.

Bore	Reces	P/N	Displacement	Pin Dia.	Comp.Height	Piston Crown Volume	Top ring	Second ring	Oil ring

## RELATED PRODUCT

## NISSAN RB28 KIT

Super quick response from the optimized weight balance and wide range of torquey output from the extra displacement.

The RB28 kit is now available with the new 86.2 / 87.5mm pistons.

**[With Conrod Bearings Bundle Pack]**

Tomei has made an option to include their Competition Bearing Series product with our kits. All the engine internals are brought to static temperature (20 degrees Celsius) and blueprinted with 0.040-0.060mm clearance bearings. This eliminates the measuring and blueprinting process for the customer, so the kit can be installed with less hassle.
