ADJUSTABLE CAM GEAR

For VR38/VQ

For more precise valve timing!

■ Superior accuracy & Durability

Rigidity, anti-wear finish and functionality of adjustable valve timing all in the limited size of the original cam gears.

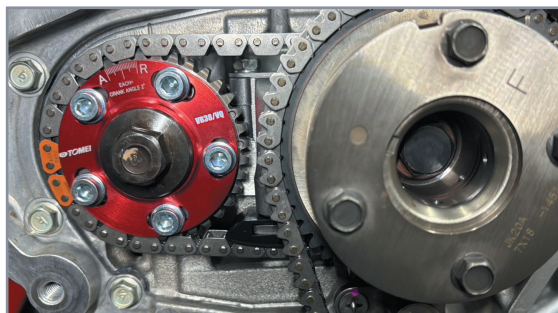

The billet-made gear teeth are designed for further wear resistance, durability along with better running in and precise chain drive.

■ Simple and functional design

The scale markings are simple and functional for ease of on-vehicle reading and timing adjustment.

■ Great upgrade also with the factory camshafts

Adjusting the valve timing on the exhaust side is an effective tuning even with the factory camshafts.

The reading scales are marked at every 1 degree.
Degreeing it 1 scale effects as 2 degrees of change to valve timing.
*Also use a dial gauge and a scale plate for adjustment.

	APPLICATION	TYPE	MATERIAL:INNER PULLEY	MATERIAL:OUTER GEAR	WEIGHT (g)
For EX	VR38DETT VQ35DE VQ37VHR	ADJUSTABLE	AL ALLOY	STEEL	210

*Cannot be installed on EX-side CVTC models.
