HEAD GASKET for VQ35HR/VQ37VHR

**Higher Compression, the Perfect Seal,
Prevent Problems with this Easy Upgrade.**

HIGH SEALING PERFORMANCE

Optimum design of the bead line securely seals the water and oil lines.

GASKET SIDE PRESSURE MEASUREMENT RESULT

Surface pressure is equally distributed providing the optimum seal.

DURABLE STAINLESS STEEL MADE

The bead top pry is made of durable but flexible SUS301. High heat radiation character of SUS301 helps transferring heat of the head and the block to coolant efficiently and prevents heat spots which causes gasket blow. SUS301 is also known for its tensile strength and it helps the beads to keep sealing the head and cylinder which repeat heat expansion and shrink all the time. This structural strength also improves torsional rigidity of the whole engine by improving coupling rigidity of the head and the block.

SUPER GROMMET DESIGN

The Super Grommet structure delivers secure, even, and reliable sealing performance.

TOMEI SUPER GROMMET TYPE

The dual sealing method of the bead structure & metal grommet, provides maximum sealing for the coolant, oil & gases around the bore circumference.

APPLICATION	Bore(Φ)	Thickness(mm)	PART NUMBER	PRICE
VQ35HR/VQ37VHR	96.2	0.7	1349962071	JPY 43,000
		0.9	1349962091
